### **General Acrylics Testimonial**

It is with the upmost pleasure that we write this testimonial in behalf of General Acrylics. We have collaborated with General Acrylics for the last 15 years in Prescott Unified School District #1 on our maintenance projects for our high school track and tennis courts.

When it came time to look at options on how we could improve our high school main field and track, we knew we could trust General Acrylics. After all, we had been asking for their expertise on this same topic for the last 7 years. Even though we did not have, the money, as so many in Arizona at the time, to make these changes, General Acrylics never made us feel like we were any less than a valued customer was. Not to mention, their experience and has been well documented over the past 61 years.

General Acrylics worked with us for almost a year putting together historical summaries of maintenance; cost analysis, as well as different quotes to take to our bond committee, school board, and community at large. The amount of support, research, and time that Jonnie, Mike, and staff demonstrated during this process, of procuring support and financing, was a crucial step in helping us make this project a reality.

In June of 2019, General Acrylics began the complete reconstruction and installation of a new synthetic turf field and state of the art post tension concrete track at Prescott High School. Their preparation, professionalism, communication, and work ethic took a \$2 million dollar project and made it a reality for our school and community that was beyond what we ever dreamt possible.

We can definitively say that working with General Acrylics was not only a smart investment but also a true partnership. We would highly recommend those who are seeking an experienced based sports facility contractor to consider General Acrylics and if you do not believe our testimonial, come see for yourself. You are always welcome to come see the real deal at Prescott High School.
